Hello Folks,

Welcome to our sixth edition of the Call To Decision Ministries catalog. You will find many new products inside that I think you will find useful and enjoy. We will continue to place any specials we have in our monthly online Minuteman Magazine. If you do not receive the Minuteman Magazine you are missing out on the biggest and best documented news magazine available. And it's completely free via email. Just send us your email address at ctdm@hotmail.com or pastorbutch@startmail.com and we will be blessed to add you to the list. Sorry it's been so long since the last catalog, but there has been a lot of obstacles to overcome to keep the ministry moving forward. All items have a suggested donation amount to help us keep the lights on. Some do have additional postage, but that will be listed. Thank you all so much for being with us.

Enlightened in the 21st Century *NEW*
These past fifty years have seen incredible advances in mankind's scientific
knowledge. We can now replace knees, hips, and other joints inside
the human body, and we use robots to do critical parts of the surgeries.
We are using retroviruses to actually rewrite the DNA within living
patients, in order to make their bodies more effective in fighting diseases.
We have seen subatomic particles, during their brief appearances, in
our supercollider. We have captured images of the moment when two
hydrogen nuclei fuse into one helium nucleus. We can speak to anyone
in the world if they are in possession of a handheld cell phone. We have
orbiting observatories that allow us to see galaxies that are over 13 billion
lightyears away, and we have sent probes to other planets even landing
one on a comet.
With all this new knowledge, and much more, it's time to ask, has any of
this information helped us to answer those age-old questions about the
purpose of life, the existence of God, the origins of the universe, and our
role within it all?
In this book, the author emphatically answers yes!
We now have enough scientific facts to answer most of those questions.
And in a clear and easily readable way, he explains what we now know
and how each of us can use these new insights, in order to improve our
lives tremendously.
This work in intended to improve your life. In fact, I am sure it will.
